

EXPAND WITH A SUSTAINABLE LINE OF PRODUCTS

Target Zero Eco Bottle

Reusable

From trash to treasure: these products or their packaging are creatively designed with the intention of being reused at end of life.

Eco bottle is reusable in most home and personal care applications.

Refillable

All out? Never fear – these items were created with the intention of being refillable so you can plus-up your product but not your waste.

Use the ready-to-fill eco bottle as the refill option for buying in bulk

Reduce Plastic

These products swag out plastic for Forest Stewardship Council-certified paper, aluminum, steel, or glass (preferably recycled) for most of their packaging.

The inner liner of the eco bottle weighs just 12g, up to 70% lighter than standard plastic bottle weights.

Include Recycled Content

These top picks contain at least 30% post-consumer recycled content in place of virgin plastic.

The outer shell is made of 100% post-consumer recycled fiber, making up 46% of the eco bottle.

Waterless or Concentrated

From powders to concentrates, these products contain less water, minimizing packaging and waste while reducing water use.

Eco bottle is the perfect vehicle for these products.

Compostable Elements

Whether the product itself, its packaging, or both, these items contain elements that are compostable to help keep waste out of landfills.

Eco bottle shells are ASTM 6868 industrial compostable certified.

Easy Pro Odor Eliminator is a 100% plant-based formula. UL certified, pet, fabric, and carpet friendly.

Easy Pro terminates odors on contact and does not mask odors.

ELIMINATES:
