

IDM Products Asset Visibility

Powered by Link Labs

Strategic Partnership with Link Labs

IDM Products has formed a strategic collaboration with Link Labs as a technology partner. Link Labs is the global leader in IoT location services technology, providing real-time enterprise asset visibility for manufacturing and logistics operations. Its flagship product, AirFinder, helps companies locate, monitor and manage business assets anywhere at any time – indoor, outdoor and everywhere in-between.

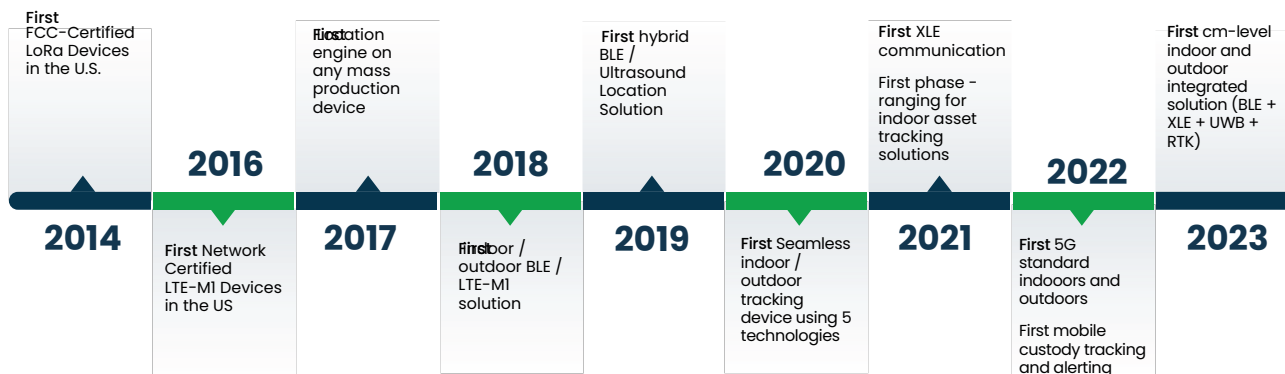

This partnership allows us to offer cutting-edge wireless communication and IoT technologies to our valued customers. By joining forces, we aim to provide unparalleled connectivity and performance for businesses. As a distributor, we are always committed to delivering top-notch products and solutions, improving data management, and driving innovation in various industries. Together with Link Labs, we look forward to creating a smarter, more connected future for enterprises.

Key Differentiators

- Unprecedented location capabilities
- Massive use case extensibility
- Lowest cost in all respects
- Comprehensive enterprise grade capabilities

- Over 2 billion IoT location and sensing events per month
- Over 250,000 infrastructure devices deployed
- Deployed to 1,200+ customer sites
- 29 US patents + international

Path to Patented Innovation

Solution Offerings

What Do We Do?

Through our asset tracking solutions, we provide real-time visibility and metrics to improve our customers' efficiency, scalability, and profitability. We help companies keep track of where their assets are, how their assets are doing, and what their assets are doing with a combination of location and condition monitoring devices configured to suit their needs.

AirFinder Onsite

Real-Time Location System (RTLS) with patented technology that tracks items within a warehouse or campus environment (inside or outside). With long battery life and up to sub-meter accuracy, AirFinder OnSite is the best option for businesses to keep track of work-in-process, inventory, equipment, tools, packages, personnel, or anything else they might need.

AirFinder Everywhere

Indoor/outdoor asset tracking solution to track items that move between geographical locations. Track zones, historical locations, and current locations with customized alerting, reports and analytics. AirFinder Everywhere uses a blend of four technologies to reduce costs and extend battery life.

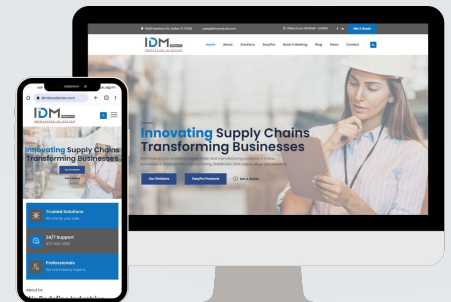

IoT Platform

Users have access to our comprehensive AirFinder IoT platform to seamlessly visualize asset location and other sensor information with customizable reporting and analytics for business improvement. The platform includes API and MQTT integration with other systems.

IDM Products

IDM Products, LLC is a national supply chain company headquartered in Dallas, Texas. Our expertise lies in procurement, manufacturing, asset tracking, distribution, logistics, warehousing, sustainable packaging, and strategic sourcing. As distributors of JanSan, MRO, office supplies, healthcare products, and Easy Pro Disinfectant Wipes, we offer comprehensive solutions for your business needs. IDM serves as an extended purchasing arm, working alongside your existing supply chain management team to efficiently manage material procurement and flow across predetermined locations.
